

# Titan 46' 4-Axle Aluminum THINWALL™ Tub Dump Trailer

## CUSTOM BUILT FOR: **Bre-Haul Trucking Ltd.**

**Burford, Ontario**

The Brezinski family has operated its trucking business throughout southern Ontario for 25 years. The Bre-Haul fleet of dump trucks and semi-dumps works most of the year hauling aggregate, but in the snow season, the fleet shifts to a road maintenance contract. Bre-Haul bought Titan's first tub-shaped end-dump in 2001 and has added three more to its fleet. "The new tub dump has all the capacity of the square bodies," says Kevin Brezinski. "We get our full weight on whether it's sand, salt or gravel. But the drivers see the real advantage."

Dan Robinson now has 4 years experience on Bre-Haul tub dumps and says he's impressed. "They clean out

really nice and you don't have to worry about unloading a little off-side. It's great for keeping the load centered and low. At the salt dome, I can back right into the door because I don't need to lift the load so high for it to slide out. The curved face of the tub body gives you a better look behind you: it doesn't block your view like a square body does."

"The trailer pulls well and the steering axle just follows right around the corner. You can see it's going to last longer, too; the way it centers the load, you get less stress and sway on the frame through curves and corners."

## **JOB PROFILE**

- sand, salt and gravel loads up to 1600 cu.ft (45 m<sup>3</sup>)
- high load stability for safe, smooth dumping at uneven job sites
- easy cornering and high visibility in city traffic
- fast, easy unloading for quick duty cycles

## **KEY FEATURES**

- original THINWALL hollow-core extruded aluminum body panels
- electrically operated side-rolling tarp
- steerable lift axle

**Strength Through Innovation**
