

Titan 48' Tandem Aluminum THINWALL™ Walking Floor Trailer

CUSTOM BUILT FOR:

Ken's Truck Repair **Chebance, Illinois**

Customers at Ken's Truck Repair count on the combined knowledge of over 45 years to be able to help them build their business. Ken's Truck Repair has created a custom-built spec for their Titan THINWALL™ trailer with a KEITH® WALKING FLOOR® for their customers. "We really listen carefully and understand our customers' needs. That's why we can deliver value, on time and when needed."

With several always in-stock at Ken's Truck Repair, their customers can see firsthand the strengths and advantages of the Titan design.

"These trailers have a top rail tough enough to withstand the hardest handling. The patented

THINWALL side panels never bow or tear like traditional post and panel units. The KEITH WALKING FLOOR provides safety and ease of unloading in any condition."

According to Ken's Truck Repair, Titan Trailers' designs the most innovative and durable product offered from any trailer manufacturer. "We have seen trailers that are over five years old come out of an acid bath and look brand new."

The look, the performance and the fuel saving design make the Ken's Truck Repair spec a very popular selection.

JOB PROFILE

- up to 123 cubic yards capacity for payloads
- low total cost of ownership required to keep product cost competitive
- high fuel efficiency for long routes and back hauls
