

# Titan 53' 4-Axle (Superquad) Aluminum THINWALL™ Walking Floor Trailer

## CUSTOM BUILT FOR:

### *Ontario Disposal*

*Oshawa, Ontario*

Ontario Disposal handles a variety of waste-hauling contracts with a mixed fleet of walking floor trailers and B-trains. The fleet owner, Harvey Ambrose, turned to Titan almost 10 years ago, when new all-aluminum transfer trailers became available.

A recent contract hauls paper residue from a Toronto recycling plant. The 53-ft Titan trailer carries up to 150 yards within Ontario's legal gross or 15% more than previous 48-ft trailers. The company switched to longer equipment when Ontario updated regulations so bulk carriers could run 53-ft units with a self-steering 4th axle to handle more weight.

Certain elements in the paper residue are highly aggressive to steel; trailers that combine steel and aluminum components suffer from galvanic reactions and expansion cracks in addition to normal corrosion problems. After 8 or 9 years on the road for Ontario Disposal, Titan's all-aluminum, fully-welded trailers still show no signs of rust or corrosion.

According to Ambrose, Titan "makes a world of difference" to his trailer maintenance and lifecycle costs.

## JOB PROFILE

- wide variety of products hauled
- maximum length and cubic capacity for legal limits in Ontario
- minimal maintenance and downtime for small-fleet management
- light weight and fuel efficiency for backhauls

## KEY FEATURES

- original THINWALL horizontal hollow-core extruded sidewalls
- lift axle plus self-steering 4th axle
- all-aluminum and stainless steel construction
- solid vinyl tarp
- KEITH® WALKING FLOOR® unloader
- highly resistant to corrosion

*Strength Through Innovation*
