

# Titan Walk-Thru™ B-Train Aluminum THINWALL™ Live Floor Trailer

## CUSTOM BUILT FOR:

**International Transport Equipment Corporation (I.T.E.C.)  
Abbotsford, BC**

For high volume carriers working the forestry industry that are looking for that extra edge in driving for profitability, Titan Trailers takes pride in introducing the first *Walk-Thru™* B-Train using Titan original THINWALL™ design. This trailer incorporates all the benefits of their original THINWALL design including increased volume, fuel economy and continuous uptime.

This B-Train, with a 28' lead and a 34'8" pup, provides operators hauling wood chips with a combined volume of almost 5000 cu. ft. A unique feature is to unload both trailers simultaneously without unhooking one from the front and one from the rear. This is especially important in cold weather applications and having to deal with frozen material. It is also tipper compatible.

*Ideal for two different commodities*

*Tipper compatible*

Operators no longer have to jackknife their B-Trains to unload and can line up the lead and the pup and continuously walk-off a 62'8" load. Operators with two different commodities have the flexibility to handle split loads and deliveries.

From the extruded sidewalls, to the stainless steel hydraulic lines and the overall innovation that this trailer brings to every haul, there is no question that this is a Titan Trailer.

## JOB PROFILE

- maximum cubic capacity for wood chips and other forestry products – almost 5000 cubic feet
- demands cold weather operation and the need to deal with frozen loads
- have to deal with minimal space available to unload and not have to wait for the tipper
- split loads and the ability to unload both trailers simultaneously

## KEY FEATURES

- lead trailer 28'
- pup trailer 34'8"
- original THINWALL horizontal hollow-core extruded sidewalls
- Hendrickson air-ride suspension
- KEITH® WALKING FLOOR®
- all-aluminum construction

**Strength Through Innovation**
